The Ditch Mowing Plan

A map showing the 59 ditch locations for which the District is responsible to maintain is now posted on our website www.mcmud113.com . The mowing map can be viewed under the “About” tab. Click on the map and then click on the + icon to enlarge it to the area you want to see. The 59 locations are tabulated and color coded as Improved or Unimproved, their acreage, and their placement. The frequency of mowing of Improved Ditches has been increased to 8 times a year to improve the appearance of the community. Unimproved ditches are cleaned out annually at a minimum.

Our contractor, Storm Maintenance and Monitoring Inc., manages the details of the mowing work schedule. The budgeted expense for the fiscal year is \$132,682.
